

TUNER RECEIVING SYSTEM, CONTROL UNIT FOR RECEIVING
RADIO WAVES BY USING TUNER, STORAGE MEDIUM FROM
WHICH DATA CAN BE READ OUT BY USING COMPUTER,
AND METHOD OF RECEIVING RADIO WAVES BY USING TUNER

5

ABSTRACT OF THE DISCLOSURE

10

15 A tuner receiving system, a control unit for
controlling a tuner receiving operation, a computer
readable storage medium, and a method of receiving radio
waves by using a tuner, are disclosed. The tuner
receiving system outputs video and audio signals by
processing the signals sent out when communication is
established between a tuner unit for receiving radio
waves from external sources and a capture card or the
like. The main part of the system or the control unit
20 discriminates the type of the tuner included in the tuner
unit, based on a control signal output from the tuner
unit after the start of the communication between the
tuner unit and the communication interface unit, and
displays a receiving station corresponding to a channel
25 receivable by the tuner, in accordance with the type of
the tuner and information from the communication
interface unit.
